- Intern, Audit Department*
- Implemented on-site due diligence on a pre-IPO internet company, responsible for vouching, data acquisition, supervising and product testing
 - Prepared, sent and tracked audit confirmation letters, and followed up on outstanding confirmations

WORKING PAPER

• Is Equity Return Affected by Country or by Industry?

Abstract: Country and industry affiliation are commonly used to account for the relative performance of stocks. These two factors usually co-moves and mutually contributes to the equity returns. This paper extracts the effect of 15 country and 11 industry dynamics and calculates the relative importance of them on the stock return volatility. Results are presented as ratios, which is country or industry related volatility to the total volatility. In the latest data, country and industry dynamics both account for half of the volatility. The narrowing gap in the past twenty years between these two factors implies the achievement of globalization.

WORK IN PROGRESS

• State Deals, Hacker Meals: Do Government Contractors Attract the Attention of Cyber Threat Actors?

with Jiaying Huang, Aldo Musacchio, Debarshi Nandy, Anna Scherbina

Description: This paper aims at solving the problem: if a company receives a government contract, is it more likely to get a cyber attack? We conducted a DiD analysis on cyber attack data to test whether firms experience more attacks after receiving their first government contract, compared with their peer firms.

TEACHING EXPERIENCE

Teaching Assistant	Brandeis University
• Introduction to Macroeconomics	Spring 2026
• Transfer Pricing	Fall 2023, Fall 2024, Fall 2025
• Options & Derivatives	Fall 2025
• Econometrics	Spring 2024
